

Door Access Control via Card

Our Door Access Control is the first one in Singapore to enable registered users to access their offices and restricted premises simply by flashing their current Ez-link card at a reader located near the entrance. From a small to large organisation setups, Chowiz Door Access Control heightened security to a stringent controlled level at uncompromised features and benefits.

Features

- High security 2-units design with encoded communication to prevent successful system hacking
- Anti tamper and user friendly
- Back-light LCD display and optional Keypad *(new!)*
- Up to 2048 cards can be registered on each controller *(new!)*
- Store up to 40,000 Audit Trial Records on non-volatile memory *(new!)*
- 32 time-zone setting *(new!)*
- Operate standalone or networked
- Programmable parameters
- Reports for analysis are available readily
- Compatible with other CSC
- Can connect up to 32 doors to a PC for management *(new!)*
- IP network enabled *(optional!)*

Benefits

- Tighter security with more slices of authentication and permission to access doors.
- Scalability is ensured and catered to accommodate the organisation's size.
- With the Ez-link card, organisations especially large ones need not invest in buying new CSC cards solely for accessing purposes and the CSC technology has proven to be reliable.
- 40,000 Audit Trial Records are secured even when the power supply fails.
- Employees movement and flow especially attendance report can be generated readily; eliminating the old-fashioned punch card method.
- With the optional keypad feature, access security is heightened even when cards are lost.

Package Includes:

- 1 unit of Reader and 1 unit of Controller
- Proprietary software with reports
- Installation
- Mechanical lock per door
